EDUCATION & INDEPENDENT COURSEWORK

Amazon, Online Course
Certified Cloud Practitioner

March 2024

Amazon, Online Course
Certified Developer

April 2024

WORK EXPERIENCE

IT Services and IT Consulting
IT Consultant

Washington, D.C. (Remote)
September 2022 – Present

- Full-stack developer specializing in Django, React, and PostgreSQL
- Developed accessible application user interfaces with Google's Material Design
- Proficient in cloud services, including AWS EC2, S3, Azure, GCP, and Heroku

Accenture Development Program
Frontend Web Developer

Washington, D.C. (Remote)
February 2022 – June 2022

- Developed 4 responsive websites using semantic HTML, CSS, and Vanilla JavaScript, achieving 100% compliance with W3 standards and a 90% user satisfaction rate for UI/UX
- Created a full CRUD CLI customer order system in Python and SQL that efficiently handled 50+ daily transactions
- Engaged in 25+ hours of one-on-one mentorship and gained insights from an experienced Web Developer in coding efficiency and best practices

Hack the Hood Tech Foundations,
System Administrator

Austin, TX (Remote)
September 2022 – December 2022

- Completed 40+ hours of specialized training in web design, UX, and the software development life cycle
- Developed foundational knowledge of Unix/Linux operating systems with an emphasis on administration
- Utilize Git and GitHub version control systems in order to streamline team workflows
- Automated routine tasks using Bash and Shell scripting

PROJECTS

Mythology/Short Story Blog

December 2023

- Created a short story blogging RESTful API with Django intended for content creation and user interaction.
- Leveraged React and Material UI for a modern and highly accessible user interface.
- Utilized JWT and Django Rest Framework for seamless user authorization and authentication
- Containerized the application using Docker, facilitating easier deployment and version control
- Optimized the site's performance and responsiveness using Flask and Nginx

Non-Profit Donations Website

March 2023

- Designed an online donation platform that facilitated a significant number of charitable contributions within the first months of launch
- Implemented secure transactions using the Stripe API, receiving zero reports of payment issues
- Enhanced user engagement by incorporating real-time donation statistics via React and ChartJS
